ABOUT US

We help to furnish cozy and comfortable bedroom interiors, taking care of our clients' health and comfort. In our offer you will find everything you need to create a cozy and safe place for rest and relaxation.

We are a Polish-based manufacturer with a long tradition. We have modern machinery resources and qualified staff. Each of our products meets rigorous quality and safety requirements. Certified components are suitable for adults, infants, and children.

Our priority is also the natural environment. The raw materials we use are safe and eco-friendly.

Our efforts are appreciated by customers in Poland as well as in many European countries. We sell our goods directly and through a network of trusted partners. Our products are regularly awarded by furniture industry specialists because our beds and mattresses are made with passion and commitment.

FDM TEAM

KIDS

Safety and comfort for children

The safety and comfort of the little ones is our priority. That's why we use only proven and certified components such as safe adhesives and raw materials. But that's not all. The Kids line thanks to its unique design encourages kids' imagination and develops their sensory skills from an early age. Waterproof and durable materials will guarantee carefree fun, which is essential for your child proper growth and development. Our products will make your kids feel like in a fairy tale.

Covers

PREMIUM

- Hypoallergenic with membrane structure
- Made of the high quality materials
- Protects the mattress from dirt and dust

ALOE VERA

- Hypoallergenic and antibacterial
- With aloe vera leaf extract
- Prevents mites growth

DUMBO

- Stain-resistant fabric
- Three-dimensional, microscopic structure
- Provides airflow, and prevents the growth of dust mites

DINO

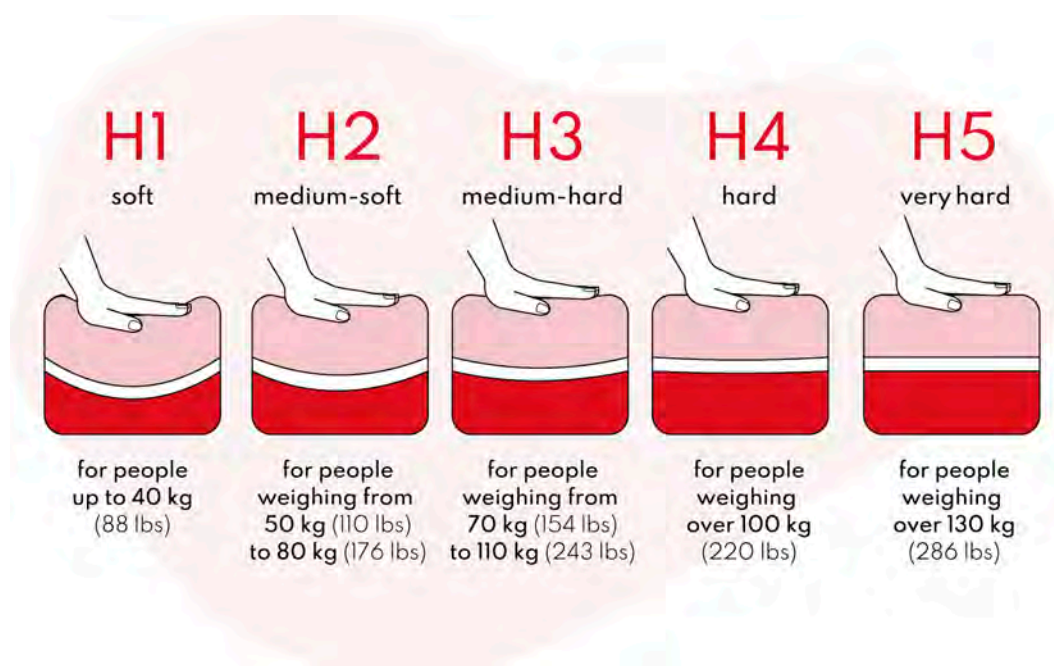

- Moisture- and dirt-repellent
- Ensures proper air circulation
- Protects the mattress from dirt

Mattress hardness

Hard or soft mattress?

The mattress hardness levels appear on a five-step scale - from H1 to H5. For years it was thought that the harder the mattress we sleep on, is the better. However, current knowledge about sleeping has changed a lot. It is now accepted that the mattress hardness should be chosen according to the user's weight:

- Soft mattresses, labeled H1, are for people up to 40 kg.
- Medium-soft mattresses, labeled H2, are good for people whose weight is between 50 kg and 80 kg.
- H3 medium hard mattresses are perfect for people weighing between 70 kg and 110 kg.
- H4 hard mattresses are ideal for people over 100 kg.
- Extra hard mattresses, which we designate as H5, are suitable for people whose body weight is above 130 kg.

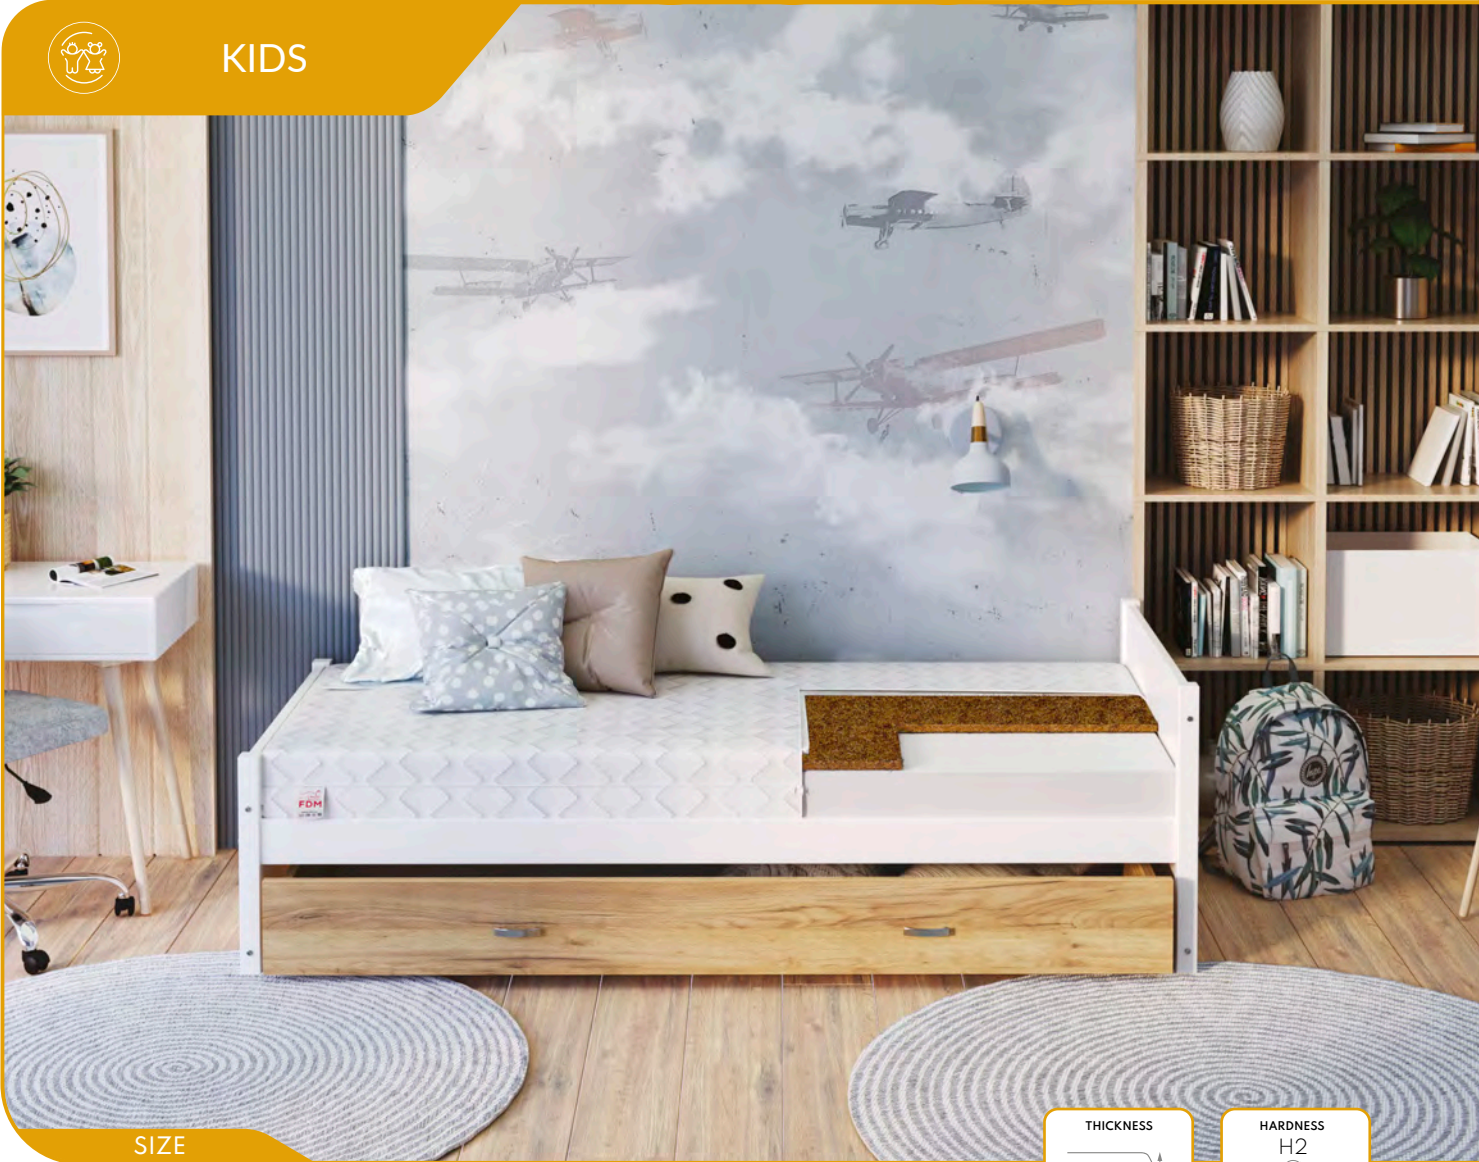

However, the mattress hardness and the way we sleep on it often eludes the above classification. Some people prefer to sleep on soft mattresses, others prefer harder ones. A good solution is to purchase a Double-sided, mattress with 2 different degrees of hardness, so that you can turn it to the other side in case of discomfort during sleep.

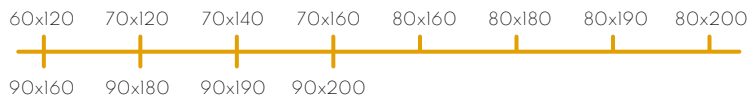

BABY COCO

KIDS

SIZE

THICKNESS

8 cm

HARDNESS

H2

H3

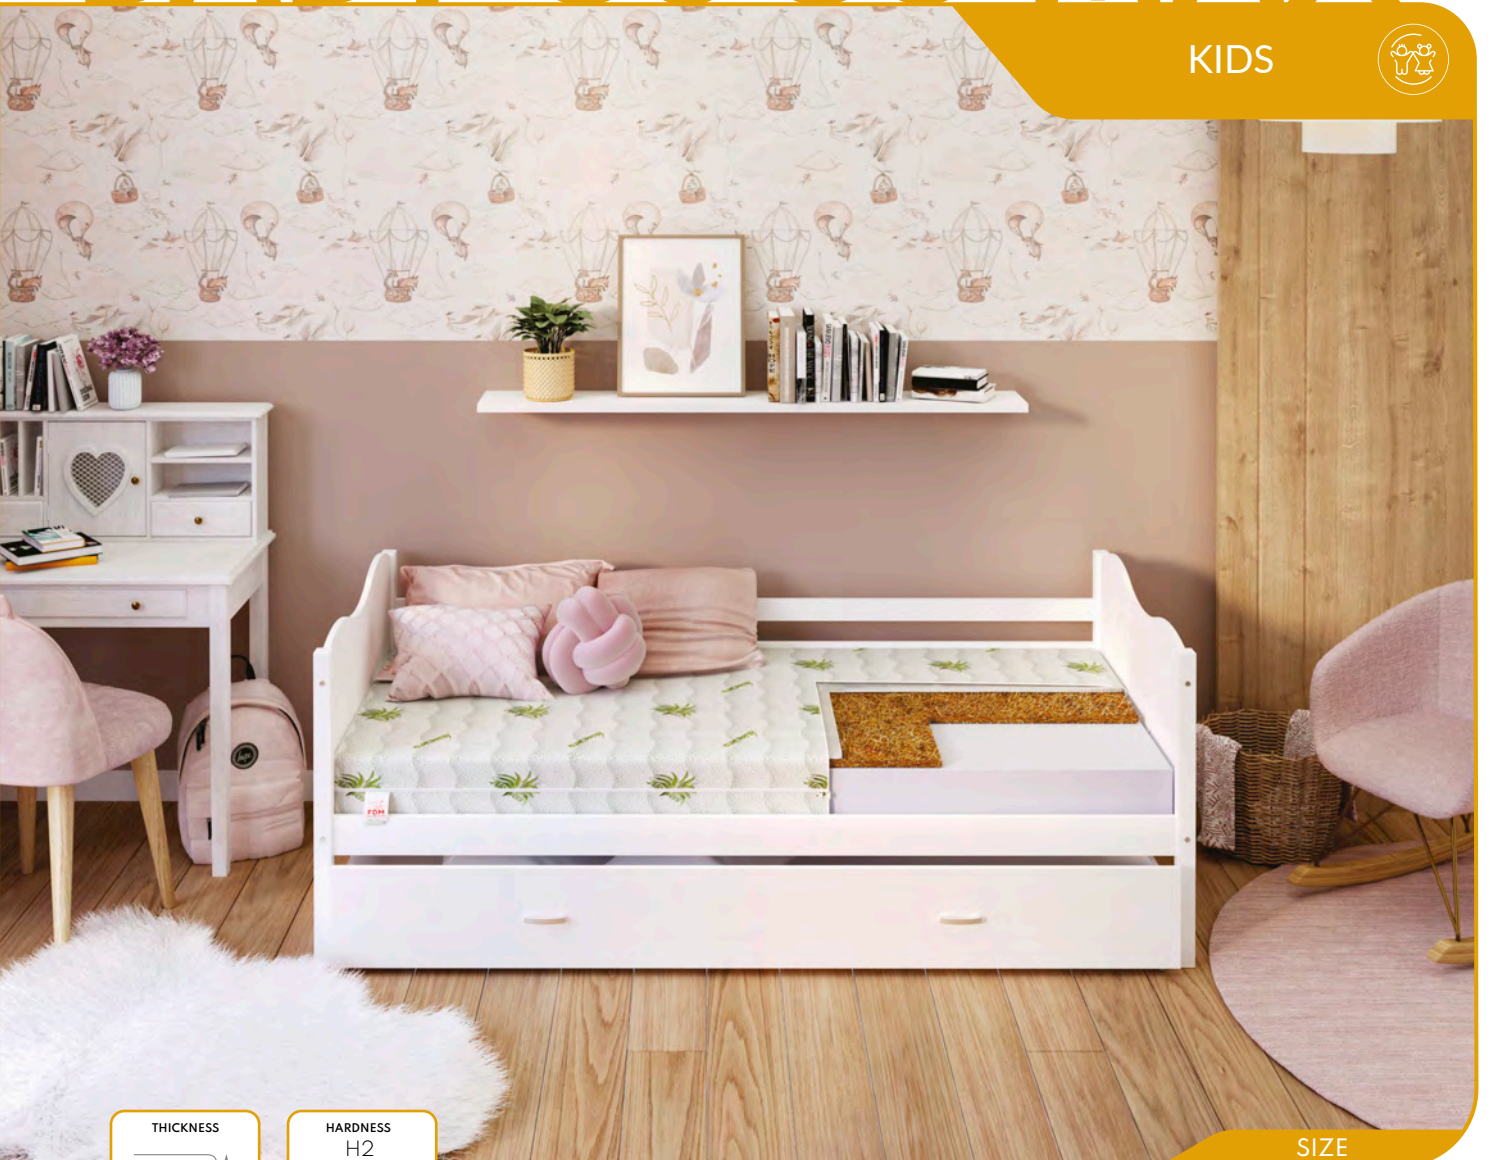

- The core of the mattress is made from T25 polyurethane foam, which keeps its shape, perfectly supports the spine and provides sleeping comfort.
- The coconut mat hardens the mattress surface, and improves air circulation.
- The coconut fibres are breathable and prevent from sweating during sleep.

BABY COCO MAX

KIDS

THICKNESS

GUIDE

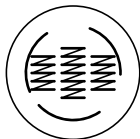

Air Flow

The fabric structure with the use of AirFlow weave enables better air circulation. It also affects the durability of the material.

Cool Gel

The cooling gel perfectly dissipates heat, provides a pleasant cool sensation, and ensures ventilation.

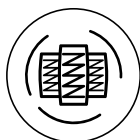

bonell

Made of high-quality wire with increased durability. They are characterized by good air circulation and are suitable for allergy sufferers.

buckwheat

A layer of natural buckwheat husk with bactericidal and anti-bedsores properties.

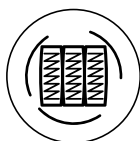

pocket

Spiral springs in pocket mattresses are placed in separate pockets dividing the mattress into 7 zones. The independent work of the springs allows for proper body alignment during sleep.

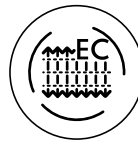

BIO Foam

Foams with the addition of a renewable raw material, such as plant-based polyol. The use of renewable resources reduces the impact on the natural environment.

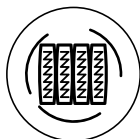

multipocket

The springs divide the mattress into 7 zones, each with the appropriate support for a given part of the body. The springs work independently of each other, reducing vibrations.

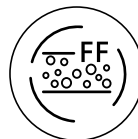

EUCAFEEL

Extremely open cells formed as a result of using innovative Hydro Tech technology regulate moisture and temperature, giving the foam cooling properties.

micro-pocket

Independently working springs with a diameter of only 25 mm divide the sleeping surface into 7 zones, which guarantees high comfort. These mattresses are durable and resistant to deformation.

Flex Foam

Elastic and breathable foam with a porous structure that allows for excellent air circulation. It is lightweight, yet resistant to deformation and provides excellent support for the body.

coconut

This is a natural material, 100% ecological, originating from coconut shells. Coconut fibers are lightweight, breathable, durable, elastic, and moisture-resistant.

Green Res

This is a flexible foam that perfectly supports weight. Its non-uniform structure supports air flow in the mattress, effectively removing excess moisture.

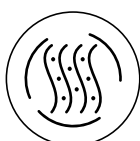

latex Clima

This is a unique product that combines durability and a porous structure that regulates temperature and allows the material to breathe. Latex provides good support for the body.

profiled HR foam

It divides the mattress into 7 zones, providing excellent support for the spine. It has a non-uniform cell structure, which makes it more elastic and better supports the body.

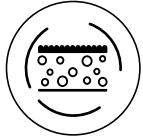

latex Ocean Blue

It provides thermal regulation during sleep, gel capsules absorb the heat released by the body, reducing the moisture that penetrates the mattress.

HR foam

A foam with increased elasticity, which significantly increases the comfort of use and prolongs the life of the mattress. It is extremely durable and resistant to deformation.

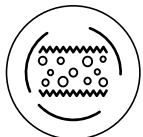

hedgehog foam

Foam with increased durability and good air permeability. The profiled surface of the foam provides very good support for the spine.

Revine Purple

Foam based on AirTech technology. Channels facilitate air circulation, preventing mold and fungi growth. The foam is resistant to deformation.

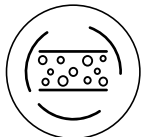

profiled polyurethane foam

High-quality foam with good air permeability provides very good support for the spine. It works well as both a mattress and a component.

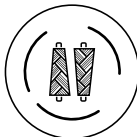

Solid Green profiled

Foam built from millions of bubbles ensures excellent air circulation, which limits the growth of mold. It is lightweight, flexible, and fits well to the body shape.

polyurethane foam

The foam most commonly used in mattress production, is resistant to deformation. It is a great solution both as a complete mattress and as a component.

Sonic Pic

Innovative quilting increases the air permeability and ventilation of the mattress insert.

profiled foam RB

Profiled foam with high durability and good air permeability provides excellent thermal insulation. It is divided into 7 zones that better support the body.

comfort zones

The zones in the mattress properly support each part of the body and distribute the user's weight over its entire surface.

foam RB

Profiled foam with high durability and good air permeability provides excellent thermal insulation. It is divided into 7 zones that better support the body.

VISCO memory

Foam reacts to pressure and body temperature. It gives the spine a natural position and support and prevents bedsores.

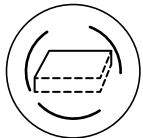

High Resilience Black

Foam with increased durability and good air permeability, provides thermal insulation and high sleeping comfort.

VISCO profiled

Heat and pressure-sensitive contoured foam conforms to the body, preventing bedsores and providing good spinal support.

sewn cover

A cover without the possibility of removal

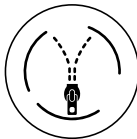

climate control fiber

Fluffy synthetic fiber improves air circulation and additionally insulates the mattress.

upholstery filing

Natural padding separates the springs from the foam layer. The flexible felt extends the mattress's lifespan and reinforces its construction.

zipper

Sewn-in zipper for easy removal of the cover.
