About us

We help to furnish cozy and comfortable bedroom interiors, taking care of our clients' health and comfort. Whether you are arranging your own apartment or you are responsible for the comfort of others, in our offer you will find products that allow you to create a cozy and safe place for relaxation and rest.

We are a Polish manufacturer with a long tradition. We have a modern machine park and a qualified team of employees. Each of our products meets rigorous requirements regarding quality and safety. Certified components are suitable for both adults, infants, and children.

We do not forget about the natural environment. The raw materials we use are safe for the environment and are eco-friendly.

Our efforts are appreciated by clients from Poland and many European countries. We sell our products directly or through a network of trusted partners. The products we offer are regularly awarded by furniture industry specialists because we put passion and commitment into the production of our mattresses and beds.

TYPES OF MATTRESSES

FOAM MATTRESSES

- Made from safe and certified foams
- Perfectly adapt to the body shape · Depending on the type of foam, they can be soft or hard
- Provide proper support for the entire body

LATEX MATTRESSES

- Excellent air circulation
- Provide proper support for the spine
- Prevent the growth of mold and fungi
- Stand out with great resilience and flexibility

BONELL SPRING MATTRESSES

- Connected by strong, tempered wire across the entire surface
- Exceptionally durable and resilient
- High air permeability
- Suitable for allergy sufferers

POCKET SPRING MATTRESSES

- Springs placed in individual pockets
- Surface divided into 7 support zones
- Springs work independently from each other
- Made using NanoHARD technology - increased spring durability

MULTIPOCKET SPRING MATTRESSES

- A larger number of springs working independently from each other
- Surface divided into 7 support zones
- NanoHARD technology increases spring durability
- Provide ergonomic body positioning

MICROPOCKET SPRING MATTRESSES

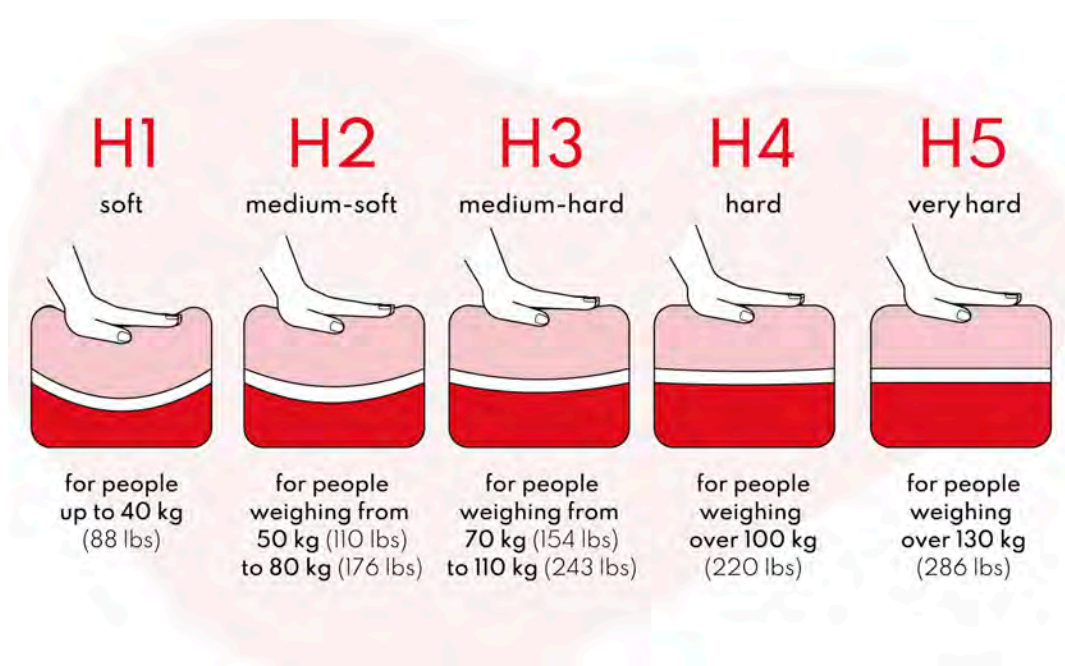

- Made with the highest technology
- Contain up to a thousand springs per square meter
- Micropocket mattresses have 7 support zones
- Guarantee the highest quality of rest

MATTRESS HARDNESS

Hard or soft mattress?

The mattress hardness levels appear on a five-step scale - from H1 to H5. For years it was thought that the harder the mattress we sleep on, is the better. However, current knowledge about sleeping has changed a lot. It is now accepted that the mattress hardness should be chosen according to the user's weight:

- Soft mattresses, labeled H1, are for people up to 40 kg.
- Medium-soft mattresses, labeled H2, are good for people whose weight is between 50 kg and 80 kg.
- H3 medium hard mattresses are perfect for people weighing between 70 kg and 110 kg.
- H4 hard mattresses are ideal for people over 100 kg.
- Extra hard mattresses, which we designate as H5, are suitable for people whose body weight is above 130 kg.

However, the mattress hardness and the way we sleep on it often eludes the above classification. Some people prefer to sleep on soft mattresses, others prefer harder ones. A good solution is to purchase a Double-sided, mattress with 2 different degrees of hardness, so that you can turn it to the other side in case of discomfort during sleep.

COVERS

JERSEY PREMIUM

- Made from hypoallergenic materials
- Exceptionally soft
- Ensures freshness and hygiene of the mattress

ALOE VERA

- Anti-allergenic and antibacterial
- With aloe leaf extract
- Limits the growth of dust mites

SILVERCARE

- Cover with silver ions
- Has antibacterial properties - kills dust mites
- Woven silver thread dissipates electrostatic charges

NANO

- Optimal fit to the mattress
- Smooth to the touch material
- Breathable, resistant to stains and stretching

TENCEL BORDER

- With biodegradable Tencel Lyocell fibers
- Soft, durable, and anti-allergenic
- Provides thermal comfort at any time of the year

CASHMERE BORDER

- With the addition of cashmere goat wool
- Exceptionally durable, lightweight, and flexible
- Ensures high sleep comfort

TANGLE

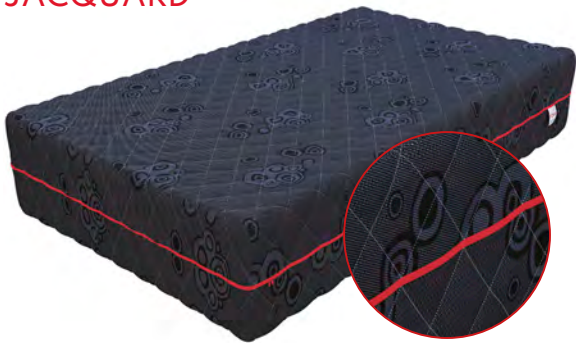

- Protects the mattress from damage
- Resistant to stains and stretching
- Has anti-allergenic properties

BAMBOO

- With woven bamboo fibers
- Has thermoregulatory properties
- Anti-allergenic and breathable

JACQUARD

- Made from the highest quality materials
- Has a structure that ensures breathability
- Anti-allergenic and resistant to stains

TENCEL

- With biodegradable Tencel Lyocell fibers
- Soft, durable and anti-allergenic
- Provides thermal comfort at any time of the year

CASHMERE

- With the addition of cashmere goat wool
- Extremely durable, light and flexible
- Provides high sleep comfort

PREMIUM

- Made of hypoallergenic materials
- Provides high comfort of use
- Protects the mattress from contamination

LUXURY HOME^{LINE}

For those aware of their expectations.

The LUXURY HOME line was created for those who expect more. It is a unique offer of solutions that have a beneficial effect on your well-being and good sleep. Luxury also means the highest quality, exceptional comfort, and relaxation in your own home. The materials of the highest quality and modern technologies used during production will guarantee deep regeneration of your body and mind. The modern and unique design will make the bedroom soothing to your senses.

- Comfortable leg position prevents swelling. The pillow has orthopedic properties, providing relief and comfort for tired legs.

50 x 60 x 8 cm

FIORE

- An 8 cm high pillow with a thermoelastic VISCO foam insert that perfectly supports the head and neck.
- Recommended for people who sleep in different positions, including on their side. Also ideal for those who want to wake up without neck pain.
- The pillow has anti-allergic properties, does not absorb moisture and is easy to care for.

50 x 60 x 12 cm

FIORE ALTA

- FIORE ALTA is a pillow with a height of 12 cm, with a thermoelastic VISCO foam insert.
- It provides ideal support for the head and neck, making it suitable for people with neck pain and for those who sleep on their side.
- The cover is made of a soft and durable fabric.

OLIVIA

- The filling of the pillow consists of thermoelastic foam in the form of granules, which reacts to temperature and pressure.
- The structure provides durability and resistance to deformation.
- Good for allergy sufferers, people with tense muscles, neck and spine problems.

50 x 70 x 8 cm

COMO

- The pillow is made of thermoelastic VISCO foam, which reacts to pressure and heat, providing perfect support for the head and neck, regardless of the user's position.
- It is suitable for people with neck and spine pain or suffering from sleep apnea, as well as for allergy sufferers.

50 x 33 x 11 cm

COMO LIGHT

- An optimally body-contouring pillow that will work for anyone, regardless of their sleeping position.
- The insert consists of flexible and breathable T25 polyurethane foam with good air permeability.
- Recommended for people with such ailments as neck pain.

50 x 33 x 11 cm

PETRA

- A wedge-shaped pillow made of polyurethane foam designed for infants. Provides even and stable support for the child's head.
- Recommended by pediatricians, it prevents food reflux during sleep.
- Made entirely of hypoallergenic materials.

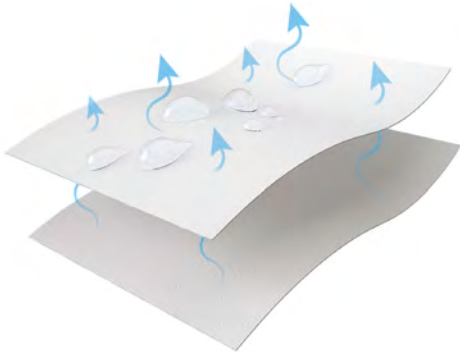

60 x 40 x 8 cm

PROTECTORS

ACCESSORIES

WATERPROOF

- Waterproof, anti-allergic, and breathable cover.
- The top layer absorbs moisture, while the bottom layer completely isolates it from the mattress.
- Facilitates mattress hygiene maintenance, protects it from moisture, bacteria, and dust mites.
- Perfect for children, but also for adults who want to take extra care of their mattress.

SIZE

	60x120	70x120	70x140	70x160	80x140	80x160	80x180	80x190	80x200
90x160	90x180	90x190	90x200	100x200	120x200	140x200	160x200	180x200	200x200

ROYAL

- The ROYAL protector provides excellent protection against moisture. The top layer absorbs it, while the bottom layer completely insulates it from the mattress.
- It provides an anti-allergy barrier, protecting the mattress from bacteria and fungi.
- Made of waterproof fabrics, including 3 layers of fleece and a double waterproof membrane

SIZE

	60x120	70x120	70x140	70x160	80x140	80x160	80x180	80x190	80x200
90x160	90x180	90x190	90x200	100x200	120x200	140x200	160x200	180x200	200x200

MAXFIT waterproof fitted sheet

- Cotton, elastic, and breathable protector provides mattress hygiene while being soft and comfortable.
- It is an excellent barrier against bacteria and fungi. The protector is hygienic and can be washed at 90°C.
- The top layer absorbs moisture, while the bottom layer isolates it from the mattress - thanks to the double waterproof membrane and triple layer of felt.

GUIDE

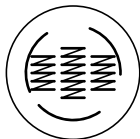

Air Flow

The fabric structure with the use of AirFlow weave enables better air circulation. It also affects the durability of the material.

Cool Gel

The cooling gel perfectly dissipates heat, provides a pleasant cool sensation, and ensures ventilation.

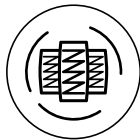

bonell

Made of high-quality wire with increased durability. They are characterized by good air circulation and are appropriate for allergy sufferers.

High Resilience
Black

Foam with increased durability and good air permeability, provides thermal insulation and high sleeping comfort.

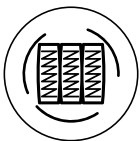

pocket

Spiral springs in pocket mattresses are placed in separate pockets dividing the mattress into 7 zones. The independent work of the springs allows for proper body alignment during sleep.

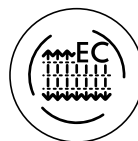

BIO Foam

Foams with the addition of a renewable raw material, such as plant-based polyol. The use of renewable resources reduces the impact on the natural environment.

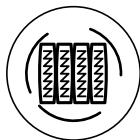

multipocket

The springs divide the mattress into 7 zones, each with the appropriate support for a given part of the body. The springs work independently of each other, reducing vibrations.

EUCAFEEL

Extremely open cells formed as a result of using innovative Hydro Tech technology regulate moisture and temperature, giving the foam cooling properties.

micropocket

Independently working springs with a diameter of only 25 mm divide the sleeping surface into 7 zones, which guarantees high comfort. These mattresses are durable and resistant to deformation.

Flex Foam

Elastic and breathable foam with a porous structure that allows for excellent air circulation. It is lightweight, yet resistant to deformation and provides excellent support for the body.

latex convolut

Flexible material that perfectly supports the figure, and at the same time cools and absorbs moisture. It is responsible for thermal comfort during sleep.

Green Res

This is a flexible foam that perfectly supports weight. Its non-uniform structure supports air flow in the mattress, effectively removing excess moisture.

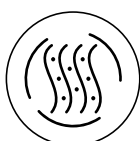

latex Clima

This is a unique product that combines durability and a porous structure that regulates temperature and allows the material to breathe. Latex provides good support for the body.

profiled
HR foam

It divides the mattress into 7 zones, providing excellent support for the spine. It has a non-uniform cell structure, which makes it more elastic and better supports the body.

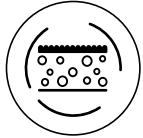

latex
Ocean Blue

It provides thermal regulation during sleep, gel capsules absorb the heat released by the body, reducing the moisture that penetrates the mattress.

HR foam

A foam with increased elasticity, which significantly increases the comfort of use and prolongs the life of the mattress. It is extremely durable and resistant to deformation.

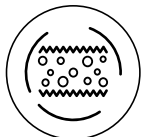

hedgehog foam

Foam with increased durability and good air permeability. The profiled surface of the foam provides very good support for the spine.

profiled Black

Highly elastic profiled foam, resistant to creases. Perfectly adapts to the figure, increasing the comfort of sleep.

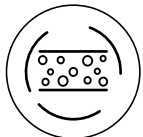

profiled polyurethane foam

High-quality foam with good air permeability provides very good support for the spine.

Revine Purple profiled

Foam based on AirTech technology. Channels facilitate air circulation, preventing mold and fungi growth. The foam is resistant to deformation.

polyurethane foam

The foam most commonly used in mattress production, is resistant to deformation. It is a great solution for couples and children

Solid Green profiled

Foam built from millions of bubbles ensures excellent air circulation, which limits the growth of mold. It is, flexible, and fits well to the body shape.

profiled foam RB

Profiled foam with high durability and good air permeability provides excellent thermal insulation. It is divided into 7 zones that better support the body.

comfort zones

The zones in the mattress that support each part of the body and distribute the user's weight over its entire surface.

foam RB

Foam with high durability and good air permeability provides excellent thermal insulation. It is divided into 7 zones that better support the body.

VISCO memory

Foam reacts to pressure and body temperature. It gives the spine a natural position and support and prevents bedsores.

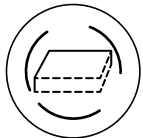

coconut

This is a natural material, 100% ecological, originating from coconut shells. Coconut fibers are lightweight, breathable, durable, elastic, and moisture-resistant.

VISCO profiled

Heat and pressure-sensitive contoured foam conforms to the body, preventing bedsores and providing good spinal support.

sewn cover

A cover without the possibility of removal

climate control fiber

Fluffy synthetic fiber improves air circulation and additionally insulates the mattress.

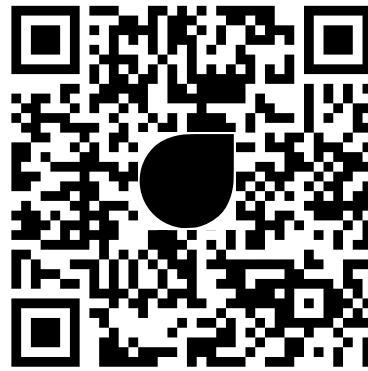

upholstery filing

Natural padding separates the springs from the foam layer. The flexible felt extends the mattress's lifespan and reinforces its construction.

zipper

Sewn-in zipper for easy removal of the cover.
